

PROTONEX Technology Corporation – Part Time Industrial Maintenance

Technician

Protonex, a private Massachusetts firm, seeks an experienced industrial facilities maintenance Technician. The Company is a leading provider of fuel cell power systems and is currently positioning itself for the rapid growth that will accompany the launch of several new product lines in 2012 and beyond.

This part-time role will report to the VP of Operations. The ideal candidate will have a wide variety of hands-on experiences with industrial facility repairs and maintenance. The individual will have a positive, “can do” attitude.

The Company’s culture is ideal for individuals who are motivated by talented co-workers, minimal bureaucracy, a personal challenge and the opportunity for success.

Requirements for this position include the following:

- Minimum 5-10 years experience with maintenance of light industrial/mfg facilities
- Well diverse knowledge of and hands-on competence with:
 - Plumbing
 - Electrical
 - HVAC
 - Air compressor systems
 - Bottled gas handling (incl. flammable gases)
 - Hydrogen electrolyzer maintenance
 - Co-ordinating tasks with outside sub-contractors
 - Facilities waste removal and sanitation services
- Must be willing to be a versatile “Jack of all trades” resource, able to effectively communicate with and support the VP of Operations with all facilities maintenance, repair, and installation needs.

Compensation package includes a competitive hourly wage and a Company benefit plan (pro-rated to 60%). The Industrial Maintenance Technician will be based in Massachusetts and will be expected to travel less than 10% of the time.

Location: Southborough, Massachusetts, Boston metro area.

No relocation benefits available.

Interested candidates may submit resumes via www.protonex.com website.
